

Information to facilitate clarity, transparency and understanding of nationally determined contributions		
1. Quantifiable information on the reference point (including, as appropriate, a base year):		
(a)	Reference year(s), base year(s), reference period(s) or other starting point(s);	Fiscal Year 2005
(b)	Quantifiable information on the reference indicators, their values in the reference year(s), base year(s), reference period(s) or other starting point(s), and, as applicable, in the target year;	20% reduction from the total national GHG emissions compared to the base year.
(c)	For strategies, plans and actions referred to in Article 4, paragraph 6, of the Paris Agreement, or policies and measures as components of nationally determined contributions where paragraph 1(b) above is not applicable, Parties to provide other relevant information;	Not Applicable
(d)	Target relative to the reference indicator, expressed numerically, for example in percentage or amount of reduction;	Taiwan aims to reduce its greenhouse gas emissions by 20 percent, equivalent to reducing emissions to 214.9 million t-CO <sub>2</sub> , in fiscal year 2030 from its fiscal year 2005 levels.
(e)	Information on sources of data used in quantifying the reference point(s);	The total emissions in the base year (fiscal year 2005) written in the above are based on the National Greenhouse Gas Inventory Report of Taiwan (The GHG inventory).

(f)	Information on the circumstances under which the Party may update the values of the reference indicators.	
2. Time frames and/or periods of implementation:		
(a)	Time frame and/or period of implementation, including the start and end date, consistent with any further relevant decision adopted by the Conference of the Parties serving as the meeting of the Parties to the Paris Agreement (CMA);	1 January 2021 - 31 December 2030
(b)	Whether it is a single-year or multi-year target, as applicable.	Single year target (fiscal year 2030)
3. Scope and coverage:		
(a)	General description of the target;	Taiwan aims to reduce its greenhouse gas emissions by 20 percent, equivalent to reducing emissions to 214.9 million t-CO <sub>2</sub> , in fiscal year 2030 from its fiscal year 2005 levels.
(b)	Sectors, gases, categories and pools covered by the nationally determined contributions, including, as applicable, consistent with Intergovernmental Panel on Climate Change (IPCC) guidelines;	Economy-wide Scope ; Gases Covered: CO <sub>2</sub> , CH <sub>4</sub> , N <sub>2</sub> O, HFCs, PFCs, SF <sub>6</sub> , NF <sub>3</sub> Sectors Covered: Energy; Industrial processes and product use; Agriculture; Land-use, Land-use change and forestry; Waste

(c)	How the Party has taken into consideration paragraph 31(c) and (d) of decision 1/CP.21;	
(d)	Mitigation co-benefits resulting from Parties' adaptation actions and/or economic diversification plans, including description of specific projects, measures and initiatives of Parties' adaptation actions and/or economic diversification plans.	Since Taiwan is a non-UNFCCC party country, it is not applicable until adaptation communication is revealed.
4. Planning processes:		
(a)	Information on the planning processes that the Party undertook to prepare its nationally determined contributions and, if available, on the Party's implementation plans, including, as appropriate:	<p>In accordance with the GHG Act passed in 2015, a five-year phase control target is set with the National Climate Change Action Guidelines, Greenhouse Gas Reduction Action Plan, and Greenhouse Gas Emission Control Action Programs for the Sectors, reflecting Taiwan's economy, energy supplies, and environment, with consideration of the current international situation.</p> <p>The central competent authority's Greenhouse Gas Emissions Control Action Program and local governments' Emission Control Implementation Program will be enforced together with the Energy Management Act and Renewable Energy Development Act for a progressive implementation to effectively manage greenhouse gases and increase energy efficiency.</p>

		In order to improve ambition and update its target, Taiwan started to amend the Greenhouse Gas Reduction and Management Act into the Climate Change Response Act to reach the net zero emission target by 2050.
(b)	Specific information applicable to Parties, including regional economic integration organizations and their member states, that have reached an agreement to act jointly under Article 4, paragraph 2, of the Paris Agreement, including the Parties that agreed to act jointly and the terms of the agreement, in accordance with Article 4, paragraphs 16–18, of the Paris Agreement;	Not applicable for Non-UNFCCC Party Countries.
(c)	How the Party's preparation of its nationally determined contributions has been informed by the outcomes of the global stocktake, in accordance with Article 4, paragraph 9, of the Paris Agreement;	Not applicable since the global stocktake has not been carried out.
(d)	Each Party with nationally determined contributions under	Not applicable since adaptation communication is still under discussion.

	<p>Article 4 of the Paris Agreement that consists of adaptation action and/or economic diversification plans resulting in mitigation co-benefits consistent with Article 4, paragraph 7, of the Paris Agreement to submit information on:</p>	
<p>5. Assumptions and methodological approaches, including those for estimating and accounting for anthropogenic greenhouse gas emissions and, as appropriate, removals:</p>		
(a)	<p>Assumptions and methodological approaches used for accounting for anthropogenic greenhouse gas emissions and removals corresponding to the Party's nationally determined contributions, consistent with decision 1/CP.21, paragraph 31, and accounting guidance adopted by the CMA;</p>	<ul style="list-style-type: none"> <li>• 2006 IPCC Guidelines for National Greenhouse Gas Inventories</li> <li>• Global Warming Potential used in IPCC AR4</li> </ul>
